

INLINE VACUUM FILTERS

These filters are designed to protect the Fuji Ring Compressor by filtering the inlet air when the blower is being used for vacuum applications. A metal housing with a removable cover, retained by clamps encloses a pleated paper filter element rated for 10 micron filtration.

REPLACEMENT ELEMENTS

Replacement elements for the Inline Vacuum Filter are pleated paper elements rated for 10 micron filtration. (Other filter elements available upon request. For example: Hepa, etc.)

INLINE VACUUM FILTERS						REPLACEMENT ELEMENT
Filter Model	For Use With Blower Model:	A Dim. (in.)	B Dim. (in.)	C Dim. (in.)	D Dim. (in.)	Filter Cover Model:
